Event held at:
HTE Technologies
8004 Reeder St.
Lenexa, KS 66214

From:
8:30 a.m. to 1:00 p.m.
June 28th, 2017

For more information:
800-444-4831

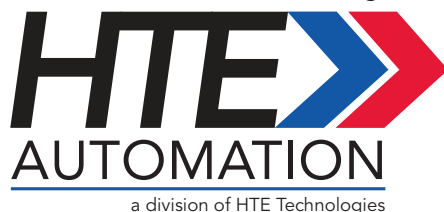

TOPICS INCLUDE

- Intro to Cognex's NEW In-Sight Profiler Measurement Sensor
- Industry standards for setting up and qualifying measurement systems
- Full 3D application solutions
- Measurement systems capabilities and best practices for deploying your system
- Introduction to Cognex's NEW In-Sight 7000 Gen 2 modular vision system
- How integrating lighting and optics can solve applications
- Hands-on training & evaluations

YOU ARE INVITED ON

June 28th, 2017 to a
Complimentary Seminar at HTE
Technologies' ROBOTICS &
VISION RESOURCE LAB

brought to you by:

UNLOCK YOUR PRODUCTIVITY

High sensitivity force behaviors

Adaptive decisions as a task is running.

Quick training for common tasks, (patterns, signals, etc)

Easy integration with existing equipment

Dynamic registration using embedded camera

Vision pick: static and moving conveyors

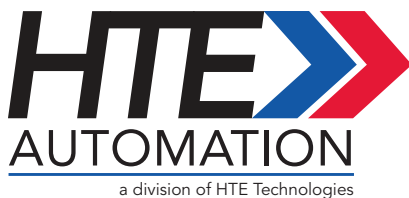

rethink
robotics™

WORK CELL ACCELERATION REVIEW

HTE will conduct a free work cell acceleration review in your plant. Our focus is on maximizing your goals for productivity, flexibility, quality control, and safety.
